

VIVEK KUMAR

Date of Birth: 7thNOV1993

Email: -: mailvivek71193@gmail.com

Address: #76,5TH CROSS KRISHNAPPA LAYOUT, HSK,

BANASHANKRI, 3RD STAGE, BANGALORE

☎: +918652457348

PROFILE OVERVIEW

- Technically versatile developer with 5+ years of experience in **providing digital solution for given business requirement**.
- **Expertise in Angular (1, 2, 4, 5, 6, 8, 9).**
- Knowledge to use **NRWL-NX architecture** as well as **MVP pattern** for project.
- Hands on experience to use **Apollo GraphQL** service for data fetching
- Knowledge to **transform basic application into Progressive Web Application (PWA).**
- Hands on experience to use **HTML, CSS, Bootstrap, JavaScript** in application framing.
- Experience in **Nodejs** for development of some of web application.
- Knowledge to use **centralized state-management (Redux) technique with latest feature** in angular application.
- Implementation knowledge of latest angular technique including **NGRX and NGXS.**
- Experience in transforming **design mockups, prototypes and user stories** into working applications.
- Experienced under **Agile Principles** in few projects as project setup is under **agile development environment**
- **Unit testing, code review, debugging, karma, jest, code coverage** done in recent development.
- Hands on **experience to use RESTful API** as per the application data need.
- Worked in **Software Development Life Cycle (SDLC)** development environment.
- Skilled in **understanding Business requirements and designing the page** using Mock **JSON and RESTful API** data.
- Basic knowledge of **SQL, python.**
- Worked on **D3JS charts** in one of application as per the requirement of project.
- Worked with development tool like **Grunt, Gulp.**
- Knowledge of **Crypto Js** to provide **security over vulnerable data in application** functional for both **client and server-side rendering.**
- Knowledge to utilize **Angular Material** library features for **responsive** and maintainable application.
- Knowledge of using **SVN Repository** for code merging and managing throughout application development.
- Taken care that application fall under all **CI/CD** timelines, **SVN repository** and **bamboo** involved throughout process.
- Introduced the usage of **Indexed DB** in one of **proof of concept** to show how one can access **application offline.**
- Implemented **Google Analytics Service** in an application which causes better result for **business to grab the customer.**
- Knowledge of using **GitHub** and **GitLab** and its repository in project.

EXPERIENCE

CSS Corp, Bangalore

- ✓ Role: **WEB Developer (Front-End).**
- ✓ Designation: **Software Engineer**
- ✓ Experience: **0.9 years (Oct-20)**

MINDTREE LTD., Bangalore

- ✓ Role: **WEB Developer (Front-End).**

- ✓ Designation: **Senior Software Engineer**
- ✓ Experience: **2 years (Sept-2018 – Sept-20)**.

TATA Consultancy Services, Pune

- ✓ Role: **WEB Developer (Front-End)**.
- ✓ Designation: **System Engineer**
- ✓ Experience: **2.6 years (Feb-2016 to Aug-2018)**.

PROJECT UNDERTAKEN:

- **Project Title: Support portal for Network Security Client (Oct 2020- Till date)**

Role: UI Developer

Technologies Used: HTML5, CSS, Angular 9, MVP (Model-View-Presenter) pattern

Description: Development of **service provider tool** to resolve software and security needs of clients.

Responsibilities:

- ✓ **Development** of UI screen and to make interacting with **GraphQL with nodejs** to fetch data.
- ✓ Follow **MVP pattern** for designing which also support **state management features**.
- ✓ Setup **continuous demo session** for progress and enhancement.
- ✓ **Requirement gathering** and clarification with BA's and technical architect.
- ✓ Provided **production support** included high **priority bugs resolution** in given time.
- ✓ To use **state-management technique in our application** for providing simplified coding structure.
- ✓ Involved in **code review process** to provide efficient and error free code.
- ✓ Continuous integration with **GitLab** to merged other developer code efficiently without conflict so that it will not affect parallel branches as well as release timelines.
- ✓ **Monitor user stories** through **JIRA tool** for update and **respond immediately for comment** or query.

Recognition:

Awarded as A-team with error free release.

- **Project Title: Online support portal for BFSI Client (April 2020- Sept-2020)**

Role: UI Developer

Technologies Used: HTML5, SCSS, Angular 9, NRWL-NX-architecture, NGXS.

Description: Designing **online service provider tool** to avail and apply **insurance benefits** for individual or employee for an organization.

Responsibilities:

- ✓ Development of UI screen and to make interacting with **java as backend** to fetch data.
- ✓ **Requirement gathering** and clarification with BA's and technical architect.
- ✓ Provided **production support** included high **priority bugs resolution** in given time.
- ✓ Follow **NRWL (mono-repo) architecture** which helps to maintain single repository for UI and backend.
- ✓ To use **state-management technique in our application** for providing simplified coding structure.
- ✓ Continuous integration with **GIT** to merged other developer code efficiently without conflict.
- ✓ **Monitor user stories** through **JIRA tool** and **respond immediately for comment** or query.

Recognition:

Awarded as a **Spot-on award**.

- **Project Title: Online Portal for HI-TECH & Media Client (August 2019- March 2020)**

Role: UI Developer

Technologies Used: HTML5, SCSS, Angular 8, NRWL-NX-architecture, NGRX, NodeJs.

Description: Designing online **ticketing tool** and **help service portal** for client to help them expanding in digital market with both **B2B (Business to Business)** and **B2C (Business to Client)** model.

Responsibilities:

- ✓ Development of several UI screen and to make interacting with **node** and **ForgeRock** to fetch data.
- ✓ Interacted with client for **requirement gathering** and **project execution**.
- ✓ Follow **NRWL (mono-repo) architecture** which helps to maintain single repository for UI and backend.
- ✓ Design every page in a **PWA** supportive manner.
- ✓ To use **state-management in our application** for providing simplified coding structure.
- ✓ Continuous integration with **GIT** to merged other developer code efficiently without conflict.
- ✓ **Monitor user stories** through **JIRA tool** and **respond immediately for comment** or query.

Recognition:

Awarded as a **Spot-on award**.

OTHER PROJECT SUMMERY:

| SNO. | PROJECT NAME -ROLE & Organization | TOOLS & TECHNOLOGY USED | DESCRIPTION & RESPOSIBILITIES |
|------|------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Advisor Dashboard for BFSI client as a UI/web developer. (Mindtree Ltd.) | HTML5, SCSS, Angular 4/5, Bootstrap, Google Analytics Service | Re-designing existing application with updated technology to track investor user experience to provide better investment advice with Google Tag Manager (GTM) Recognition: Awarded as an A-Team award. |
| 2 | Part Inventory Counting System for ASSA ABLOY as a front-end Developer and architect (TCS) | HTML5, CSS3, Angular2/4, Bootstrap, SVN. | Designing web application for one of the most access solution providers mainly for door locking system . |
| 3 | ONE REPAIR PORTAL for BHGE Oil and Gas Engines as a front-end developer. (TCS) | HTML, CSS, Angular JS, Bootstrap | Designing web application to provide repair management of oil and gas turbine engine by providing repair cost and to suggest better options to client. |
| 4 | SAS ON GO for GE Oil & Gas as a front-end developer. (TCS) | HTML, CSS, Angular JS, Bootstrap, Predix Authenticator. | Designing web application to maintaining oil fields tracking and monitoring through sensor data and give result on an application in a graphical and tabular format. |

| | | | |
|---|----------------------------------------------------------------------|---------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 5 | Ambulatory for GE- Healthcare as a front-end developer. (TCS) | HTML, CSS, Angular 2, Bootstrap | Designing web application which helps in hospital to track down patients and availability of bed in case of emergency. Tracking all patient data by doctor. |
|---|----------------------------------------------------------------------|---------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

EXTRA CURRICULAR:

- Active participant of **inter-IT basketball tournament**.
- Created a **safety champ** and **fitness group** in ILP-training which uses to log its workout hours and report an incident for fellow colleague in case of emergency.
- Event coordinator in most of college level fest and recognized as **best coordinating group** of year.

HOBBIES:

| | | |
|----------------|-------------------------------|----------------------|
| Computer Games | Playing basketball & football | Swimming |
| Cooking | Dancing | Video Editing |
